

Feeding the Future,
Theme: Fostering Sustainable Food

Congress Overview

The 3rd Congress on Sustainable Agriculture and Food Security (COSAFS2026) will be held at the Imperial Hotel Bintulu, Sarawak, Malaysia, from 3rd to 6th August 2026. This prestigious congress will showcase innovative agricultural practices, technological advancements, nutraceutical and functional food research, and discussions on national and global food policies, alongside initiatives that promote sustainable agriculture and strengthen food security. Serving as a platform for collaboration among agriculturists, researchers, policymakers, institutions, industries, and communities, aligning with Sarawak's aspiration to become a net food exporter by 2030. COSAFS2026 also promotes the development of value-added food products that enhance health, nutrition, and well-being through sustainable agricultural innovations that align with the theme "Feeding the Future, Fostering Sustainable Food".

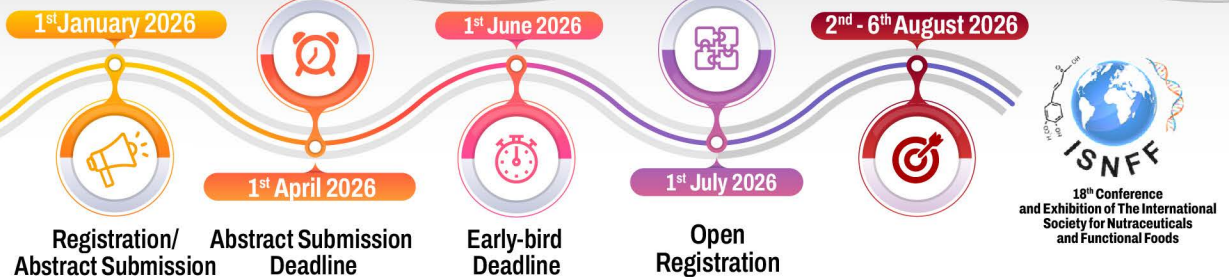

COSAFS2026 will serve as a platform for four concurrent international conferences, namely the 4th International Scientific Conference on Indigenous Crops (4th ISCIC2026), the 3rd International Conference on Fisheries and Animal Sciences (3rd FISAS2026), the 3rd International Conference on Food and Industrial Crops (3rd ICFIC2026), and the 18th International Society for Nutraceuticals and Functional Foods Conference (18th ISNFF2026).

The 4th ISCIC2026 will focus on the potential of indigenous and underutilised plants as sustainable crops. The 3rd FISAS2026 will highlight advances in fisheries and livestock research for productivity and conservation. The 3rd ICFIC2026 will explore sustainable food and industrial crop development, including bio-based innovations. Meanwhile, the 18th ISNFF2026 will present findings in nutraceuticals and functional foods related to nutrition, health, and disease prevention. This also marks the first collaboration between COSAFS and ISNFF, establishing a unique platform for multidisciplinary engagement across the food and agriculture value chain. The conferences will feature keynote sessions, oral and poster presentations, and interactive discussions, drawing over 500 participants from academia, industry, government, and farming communities to share knowledge and advance sustainable solutions for global food security.
