On behalf of the Organising Committee, we cordially invite you to participate in the 2nd Regional Conference on Culture Collections 2019. The awareness on conservation of genetic resources and biodiversity focusing on microorganisms has shown significant increase over time. In supporting this, many countries and individual institutions are taking the initiatives to establish microbial resource centres, to support research or to provide services for their countries/regions. We hope this conference will impart beneficial knowledge and information for researchers, culture collections and industries in the regions with regard to related issues on microbial culture collections and their management.
