

Stream of Life

Ina Krisantia, Asraf Abdul Rahman & Mohd Nazri Saidon

This project is located in a sensitive area of Tasik Raban, Lenggong, Perak. The site is surrounded by oil palm and rubber plantations. The current site has potential sceneries but lacks activities and connectivity. Hence, it is not fully utilised.

Chen Fei Wen has proposed several public recreational activities to enhance the environment. The designer has proposed a unique concept called "The Stream of Life" as a design metaphor. The stream concept is implemented in the flow of circulation and life was implemented in the greenery environment to increase the quality of life. This concept is further translated into an organic form in the master plan.

■ Chen Fei Wen

With this concept, Chen Fei Wen proposes a flow of circulation in every interesting spot to create interesting connectivity throughout the water sport center and park. In the central park, she has proposed a link made of pedestrian pathways and jogging tracks to connect all the spaces with the parking area.

In addition, she also proposes a green environment in the recreational area to increase the quality of life. The design accommodates passive recreational activities for adults and children in a series of small park spaces for picnics, walking and jogging. These new activities are proposed to enliven this area.

As a conclusion, the design attempts to embrace the Stream of Life concept which includes the flows of circulation and greenery environment. With the design metaphor derived from a stream, the life concept has been clearly illustrated in the proposed master plan.
