

Modular Toilet System

Hasri Yunardi Hassan & Rahinah Ibrahim

There are always a large number of visitors going shopping at Jalan Tuanku Abdul Rahman everyday and the number of visitors usually increases during weekends and major festive seasons. Due to this large turnouts, the use of public facilities such as toilets always become a major concern to the authorities.

The design consists of both male and female toilet sections. It includes a proposed platform for mothers to change their babies' diapers. In order to facilitate users of both genders and all ages, this modular toilet system has a user-friendly vending machine that sells basic needs such as tissue packs, sanitary napkins, tampons and baby diapers. Furthermore, the designers have also successfully addressed the hygienic aspect by featuring its own green features for easy maintenance and having natural ventilation for releasing bad odours.
