

Young Coconut Extractor

Nik Aizan Nik Abdullah, Sazrinee Zainal Abidin & Rahinah Ibrahim

Observations and sensitivity to problems are among methods employed to generate ideas. Based on selected current issue students are required to improve selected mechanism, system design and to focus on the reliability aspect. The young coconut extractor integrates a simple shape that is easy tool to operate and was given an attractive soft pastel colour appearance.

The design is tailored to a housewife or any female user. The culture of women at work assumes them not involving in heavy work particularly with one that exerts force or energy. "Pluck it" is a device developed for a woman to operate easily in a task which is otherwise traditionally performed by a man. The product is a result of a comprehensive study on women at work as they are often burdened by this hardship.
